B.Tech, Computer Science and Engineering

Address : 50 marriamman kovil st vairankuppam

Summary

Computer Science and Engineering undergraduate with hands-on experience in **Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Full-Stack Development, Backend Engineering, and Machine Learning**. Experienced in designing scalable web applications using **Python, FastAPI, Next.js, React, TypeScript, PostgreSQL, Docker, and Kubernetes**. Developed enterprise-grade AI solutions including multi-agent systems, semantic code search, vector databases, and production-ready cloud-native applications. Strong foundation in **Data Structures & Algorithms, Object-Oriented Programming, System Design, REST APIs, Database Management, and Software Engineering**. Passionate about building scalable AI-powered applications and solving complex engineering problems.

Education

SRM IST-Trichy

B.Tech · Computer Science and Engineering

2027

CGPA - 8.3/10

KRISHNASWAMY MEMORIAL HR SEC SCHOOL CUDDALORE

Class XII - STATE BOARD OF SCHOOL EXAMINATIONS TAMILNADU · MPC ·
CUDDALORE

2023

Percentage - 77%

Skills

Programming Languages: Python, Java, C, SQL, JavaScript, HTML, CSS

Languages and Frameworks: React.js, Next.js, Node.js, FastAPI, LangChain, TensorFlow, PyTorch, OpenCV

Tools and Technologies: Git, GitHub, Docker, MongoDB, MySQL, PostgreSQL, Vercel, VS Code, Streamlit, Linux, Bash, Microsoft Excel, Microsoft PowerPoint, Microsoft Word

Technical Skills: REST API Development, Backend Development, Full Stack Development, JWT Authentication, API Integration, CI/CD, Version Control, Responsive Web Design, Prompt Engineering

Domain Knowledge: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Artificial Intelligence, Machine Learning, Deep Learning, NLP, RAG

Projects

NovaForge AI – Enterprise AI Code Intelligence Platform

Personal Project · Python, FastAPI, LangChain, LangGraph, Qdrant, PostgreSQL, Redis, Next.js 15, React 19, TypeScript, Docker, Kubernetes, GitHub Actions

Generative AI | Full Stack Development |
Software Engineering

Built an enterprise AI platform for GitHub repository analysis using LLMs and Retrieval-Augmented Generation (RAG).

Implemented semantic code search, hybrid retrieval, vector embeddings, multi-agent workflows with LangGraph, secure REST APIs, streaming AI chat, Docker-based deployment, Kubernetes orchestration, and CI/CD using GitHub Actions.

SagaDrop – Premium AI-Powered E-Commerce Platform | [LIVE DEMO](#)

Personal Project · Next.js 15, React 19, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, Prisma ORM, JWT Authentication, Stripe, Razorpay, Docker, Git

Full Stack Web Development

Developed a production-ready AI-powered e-commerce platform featuring secure authentication, product catalog, shopping cart, wishlist, order management, payment gateway integration, and responsive UI. Designed scalable REST APIs, PostgreSQL database architecture, and modular backend services using modern software engineering practices.

Flight Fare Prediction Platform | [Live Demo](#)

Personal Project · Next.js 15, React 19, TypeScript, Tailwind CSS, FastAPI, Python, PostgreSQL, Redis, Docker, Kubernetes, JWT Authentication, GitHub Actions, Prometheus, Grafana

Full Stack Web Development | Machine
Learning

Developed a full-stack Flight Fare Prediction platform using Next.js, FastAPI, PostgreSQL, and Redis. Implemented secure REST APIs with JWT authentication, integrated machine learning for fare prediction, and deployed the application using Docker and Kubernetes. Automated testing and deployment with GitHub Actions and monitored system performance using Prometheus and Grafana.

AegisXAI – Enterprise Risk Command Engine | [Demo](#)

Personal Project · Python, FastAPI, Scikit-learn, SHAP, LIME, SQLAlchemy, PostgreSQL, Docker, Git

Artificial Intelligence | Machine Learning

Developed an enterprise risk prediction platform using machine learning and explainable AI techniques. Implemented SHAP and LIME for model interpretability, built RESTful APIs with FastAPI, integrated PostgreSQL using SQLAlchemy ORM, and designed a modular microservices architecture for scalable deployment.

Certifications

Infosys Springboard – Artificial Intelligence Learning Path | [DRIVE](#)

Infosys Year:

Completed a comprehensive learning path covering Artificial Intelligence fundamentals, Machine Learning concepts, data preprocessing, model development, and practical AI applications through hands-on learning modules and assessments.

Languages

English [Professional Working Proficiency], Tamil [Native Proficiency]
